### ABOUT ME

As a student approaching graduation, I am eager to bring my passion for innovation, experience in OutSystems, and knowledge in programming languages like Python and Java, in database management, and in web and mobile applications development to the field.

Throughout my academic journey, I have gained valuable experience through internships and coursework, where I have developed many projects, some of which featured in my portfolio. These experiences have allowed me to develop my technical abilities, hone my problem-solving skills, and gain a deeper understanding of the technology industry as a whole.

I am excited and motivated to embark on the next chapter of my career, to collaborate with others to achieve shared goals, to apply my knowledge and skills to real-world challenges, and open to take on new challenges in order to continue learning and growing in the field.

I am passionate about staying up-to-date with the latest trends and advancements in technology, and I am committed to using my skills to create innovative solutions that benefit both businesses and society as a whole. That's why I am currently developing a mobile application using state-of-the-art technologies, that recognizes ASL gestures and classifies them automatically in real-time, in order to facilitate the communication between deaf people and non-deaf people.

With my strong technical foundation, passion for innovation, and commitment to excellence, I am confident that I can make a valuable contribution to any team and thrive in the fast-paced and ever-changing world of technology.
